

2023 - Back by popular demand!
New drop off dates added - Apr 15 & May 6

Switch your lawn equipment from gas powered to electric and we'll pay up to half the cost

One gas-powered lawn mower produces as much air pollution as 43 new cars

Over 17 million gallons of gas are spilled each year refueling lawn and garden equipment – more oil than was spilled by the Exxon Valdez

The Village of Pleasantville's Climate Smart committee received another grant from NYS and has allocated \$5,000 in rebates to promote the transition from noisy, polluting, gas powered lawn equipment to quiet and efficient electric models.

The details

1. Buy a new electric:

Lawn Mower - get a 50% rebate up to \$125 when you turn in your old gas model.

Lawn Mower - get a 50% rebate up to \$75 (for first time buyers - no trade in required).

Leaf Blower or Weed Whacker - get a 50% rebate up to \$75 with gas model turn in.

2. Bring old gas clunker to the Pleasantville Recycling Center on Sat. Apr 15th or May 6th from 9am - 12pm. We'll be there to process your rebate. Bring or email us your receipt. Equipment must be drained of all liquids before they turned in at the recycling center.

3. Get a check in the mail

Rebates are first come, first served, while funds last. Must be a village resident. Limit of one mower and one blower rebate per household. Valid for equipment purchased after 3/15/23.
